

ART EXHIBITION

February - April 2015

MICHAEL T. NOONAN

Michael T. Noonan is a fine art photographer specializing in abstract images of water. His photographs range from completely conceptual to literal representations of water from around the world. His work traverses temporal conditions of day and night, chaos and calmness, color and light - all with a unifying beauty using abstractions of water as a universal and essential element. He specializes in high resolution, raw images that are neither enhanced nor edited in any way. No colorizing, no cropping, no adjusting, no manipulating - what you see is what he captured with the camera. They are produced in limited edition; large-scale format (60x90; 50x75; 40x60); printed on archival matte or gloss paper; unmounted or single/second surface mounting; framed or unframed... and can be found in private collections worldwide.

A selection of his work can be seen at www.michaeltnoonan.com.
